Seamless Communication for Smart Buildings and Homes

INSPINIA's intercom solutions are the key component of any smart building, using VOIP technology for efficient communication and access control. Each intercom unit automatically configures with its own IP address, eliminating the need for manual setup or a SIP server.

Mobile & Touch Panel Control

INSPINIA's Touch Panels (INS4, INS8, INS10) and Mobile App offer an intuitive interface to manage your intercom system. With real-time communication, HD video, and touch control, you can easily answer calls, view feeds, and unlock doors. Seamlessly integrated with your smart home or building automation system, they provide centralized control for intercom.
